Try It: Roll Logs for a Lincoln Table and Chair

Here is a wonderful craft idea for a school or group for this is most inexpensive. All that is needed is paste, newspaper, pins, and paints. Did you know that this is what logs are made of? It seems that we are always needing logs to make school projects or for table decorations during February.

In the old days they had log rolling parties, you can have one, too. These little paper logs make good doll furniture, too, so some of your girl friends might want to come over to build furniture for their dolls, while boys could make log cabins.

For a log cabin the strips of paper should be about 12 inches wide and 14 inches long. Take care and roll them up tightly, pasting the last two inches of the end. Let this dry. You can use small boxes or cardboard for the underneath part of tables or beds. When you have the logs in place make them secure by pinning them with straight pins. To make them look more like real logs, paint them with brown water color.
